OPERATION OF AIR TRANSPORT

Borisyuk O **.** Dominant contribution of dipoles in the turbulence-generated noise in a rigid pipe

Karuskevich M . Fatigue failure prediction for fuselage skin made of alclad aluminium alloy

Lastivka I. , ***Doroshenko K.*** , ***Nechyporuk O*** **.** , ***Tereshchenko Y.*** Effect of hysteresis on efficiency of compressor cascades during streamlining by unsteady flows

Maslak T. Atomic force microscopy investigation of the D16AT alloy deformation relief

Oleg M. Variational direct problem of transport aviation systems development forecasting

Yutskevych S. Feature of D16AT aluminium alloy deformation relief evolution under variable amplitude loading

Solovykh Ye. Reduction in stressed state of strengthening coatings via using a discrete

structure of island type

AVIATION CHEMMOTOLOGY

Ali Ibragim Asaad, Kochirko B., Boichenko S. Technological calculation of innovative scheme for Iraq oils processing

INFORMATION AND COMMUNICATION SYSTEMS AND NETWORKS

Basarab O., Zyubina R. Formation of approaches to the creation of scientific and analytical apparatus to enhance the functioning telecommunications system SBS

Korniyenko B. Static and dynamic characteristics of transport processes in disperse system

Koba O., Dobrina O. Using clastering-based segmentation algorithms in regions of interest detection on the medical images

Lutskiy M. The concept of it education in Ukraine *Contents ISSN 2075-0781* . Science-based technologies, 2013. № 2 (18)

INFORMATION SECURITY

Lekakh A., Cheremskoy I. The method of time spent estimating on processing and transmission of compressed video stream

Petrenko A. Permission of signals in the first order discrete tracing measuring devices

according to the areas of capture

Shmatok A., Petrenko A., Tytov V., Borysenko E. Active attack on steganography container

Vlasov A . Estimation of quality methods disguise images for detection edge contours

Yudin O., Kurin K. Decompression of images on base of method of decoding according to the amount of bit changes

YudinO., Buchyk S. The analysis of normatively–legal providing of defence of state informative resources in information–telecommunication systems

MANAGEMENT SYSTEMS

Zhangisina G. , ***Kuldeev E.*** , ***Shaikhanova A.*** Data protection from network attacks

Omelchuk I., Chyrka Y. Features of the instantaneous frequency estimation algorithm with pre-filtering

Prokopenko I., Babych D., Urban R. Local optimal rank after demodulation algorithm of noise-type signal detection

TRANSPORTATION SYSTEMS

Akimova T. Improvement access to air travel for disabled persons

Ivannikova V., Manziuk T., Tabakar T. Interrelation between free baggage allowance and ticket price in air transportation

Marintseva K. The strategies of the airports regional network development

Matiychuk O., Kryshkevych K. Accessibility of transport systems in passenger transportation

ECOLOGY

Radomska M . Complex assessment of urban landscapes condition based on bioindication methods
